Hyeon Jeon | CV

hj@hcil.snu.ac.kr • hyeonjeon.com • jeonhyun97

Education

Academic Qualifications

Ph.D. Student, Computer Science & Engineering — **Seoul, Republic of Korea**
Seoul National University — *Sep.2020 – Present*
- Human-Computer Interaction Lab. *(advisor : Prof. Jinwook Seo)*
- Combined M.S/Ph.D course

Bachelor of Science in Computer Science & Engineering — **Pohang, Republic of Korea**
POSTECH (Pohang University of Science and Technology) — *Mar.2016 – Aug.2020*
- Early graduation (7 semesters)
- Magna Cum Laude

High school Graduation — **Seoul, Republic of Korea**
Hana Academy Seoul — *Mar.2013 – Jan.2016*

Research Interest

Information Visualization, Visual Analytics

Mining Software Repository, Software Development Process & Productivity

Publications

International Conferences

[C1] Youngtaek Kim, Jaeyoung Kim, Hyeon Jeon, Young-Ho Kim, Bohyung Kim, Hyunjoo Song, and Jinwook Seo. "Githru: visual analytics of understanding software development context through git historical metadata analysis". *IEEE Transactions on Visualization and Computer Graphics (TVCG, Proc. VAST), to appear.*

Experience

Research Experiences

Human-Computer Interaction Lab. — **Seoul, Republic of Korea**
Seoul National University — *Jan.2020 – Aug.2020*
Undergraduate Intern *(advisor: Prof. Jinwook Seo)*

Algorithms Lab. **Pohang, Republic of Korea**
POSTECH (Pohang University of Science and Technology) *Jun.2019 – Aug.2019*
Research Student *(advisor: Prof. Heekap Ahn)*

Computer Vision Lab. **Pohang, Republic of Korea**
POSTECH (Pohang University of Science and Technology) *Jan.2019 – Feb.2019*
Research Student *(advisor: Prof. Minsoo Cho)*

Selected Projects

C/C++ MATH Formula Viewer – VS Code Extension
Personal Project *Dec.2019 – Jan.2020*
We can utilize useful mathematical functions in C/C++ by including `math.h` or `cmath` library. However, it is hard to recognize the full functionality of the function at a glance if the function call is deep and complex. Therefore, I developed VScode extension which parses the math function and its arguments recursively and hovers the generated Unicode-style math formula. The product had achieved **4K downloads** in the marketplace. Refer Github Repository for details.

BCRiders – Blockchain-based Delivery Platform
POSTECH-YONSEI SNS Program *Jun.2019 – Jul.2019*
I developed web service, which efficiently, safely provides online food delivery and review system with the undergraduate students from *Yonsei University*. We used the blockchain and smart contract functionality supported by Ethereum. Refer Github Repository for details. *(advisor: Prof. James Wonki Hong)*

Vivim – Nice, Convenient vim plugin for IntelliJ IDEA
Started from POSTECH Software Design Methods (CSED332) term project *Sep.2019 – Current*
I developed a convenient, simple, easy-to-use vim plugin that can be used in IntelliJ IDEA. The goal of the product is to eliminate unnecessary complexity of the original vim editor/plugin, and to improve the productivity of code generation. Now preparing for release. Refer Github Repository for details.

Teaching Experiences

Teaching Assistant
- *Digital Computer Concept and Practice*, Seoul National University 2020 Fall

CSE Turing Program Tutor
- *Algorithms* (CSED331), POSTECH 2020 Spring
- *Automata & Formal Languages* (CSED341), POSTECH 2019 Fall

Academic Experiences

Exchange Student **Seoul, Republic of Korea**
Sookmyung Women's University *Jun.2018 – Jul.2018*

Personal Data

Skills

Programming Languages

- c/cplusplus, Java, Python, ocaml, Verilog, solidity, javascript, typescript, maude

Languages

- First Language Korean
- Fluent in English

Personal Interests

Traveling

- Visited *USA, Canada, Australia, Japan, China, Thailand, Vietnam, India, Ireland, England, Northern Ireland, Wales, Italy, France, Austria, Luxembourg, Belgium, Netherlands, Germany, Czech Republic, Spain, Swiss...*
- Received the certification of finishing *Camino de Santiago (The Road to Santiago)*.

Music

- Amateur Guitarist & Composer
